The Hullan Consortium

Scuola Superiore Sant'Anna

Royo®

Hullan Technologies

The purpose of the **HuMan project** is to create human-centered workplaces to **support workers'** in order to increase the competitiveness of the manufacturing companies through the creation of an optimal environment for human automation integration and cooperation.

In the different use cases of **HuMan**, the shopfloor and the workers are monitored using innovative IoT technologies. When physical or mental stress is detected, new tools and technologies are offered to the operators, creating a direct support during tasks which is activated and modulated by the **HuMan** intervention system.
